Experience

Construction Worker

Double Eight Fire Protection

Aug 2015 - Dec 2017 (2 years 5 months)

Working here as an apprentice I would assist the licensed pipe fitter by cutting grooving and threading pipe and supplying the fitter with the right tools for the job. When we came across a problem the fitter would show me how to fix it and why it needed to be fixed. Eventually I became experienced to do things on my own and help complete jobs faster for the company. This job taught me to always pay attention and keep my mind open for solutions.

Construction Worker

Brocon Construction, Inc.

Dec 2017 - Jul 2019 (1 year 8 months)

At Brocon my job was to frame, hang, and finish drywall systems and grid ceiling systems for warehouses and office spaces. I help framers and hanger complete jobs and help satisfy the customers. I work under a supervisor who gives me a daily assignment and I will assist them with tasks that they may need to be completed. This has also helped me become a very teachable person and has also helped me become independent and helped me with my problem-solving skills.

Content Manager

The Scotts Miracle-Gro Company

Jul 2019 - Sep 2021 (2 years 3 months)

At SMG I was working as a contactor that was labeled as a content specialist. I would work closely with the brand team and development team to update and populate content on the websites Scotts Ecommerce sites. I worked with multiple CMS systems such as: Drupal, Wordpress, Shopify, Contentful, Prolific, and Magento 1 and 2. This job has taught me a lot in the processes of working with a development team and has taught me invaluable information on how the office space works in a large company. I had left this job to start my coding bootcamp.

Education

The Ohio State University Boot Camps

Web Development, Developer

2021 - 2021

12 Week Web Development Coding Bootcamp

Columbus State Community College

Grove City High School
